PRODUCTS FOR THE ALUMINIUM INDUSTRY

Materials:

- * Refractory materials for all installations
Including 80% Fused Silica and Zirconium Silicate based castables
- * Crucibles and other clay graphite / Silicon Carbide based products
- * Pre-shaped ceramic and refractory parts
Including filter boxes, launders, hot tops, pins and spouts and riser tubes
- * Zero Thermal Expansion (ZTE®) Ceramic Shapes
As per pre-shaped parts, manufactured using ZTE® material

Consumables:

- Thermal analysis cups
Thermal analysis to accurately assess molten metal quality
- Furnace cleaning flux
- Molten metal cleaning fluxes (including Sodium free products)
- Flux injectors - furnace cleaning and molten metal (incorporating degassing)
- Parting / mould release agents
- Preparation equipment for parting agents
